

FOUNDER'S VISION

"Create a definite plan for carrying out your desire and begin at once, whether you are ready or not, to put this plan into action."
- Napoleon Hill

People spend a great deal of time with their therapist in primary treatment planning a strategy for getting their life back on track and staying sober. What seems so easy in treatment often proves to be much more challenging in reality. Our goal is to empower you to take the wheel in your recovery and guide you to create the life you have envisioned. We provide a safe and serene environment with a staff dedicated to helping you move your plan into action. It is our dream to have you experience the transition into your new lifestyle with a foundation rooted in healthy and positive choices.
